

# Release Notes for Check and Improve 5.0 (Build 1445)

## 1 General information

Please check for new App versions!

### 1.1 Operating systems

- Microsoft Windows 8.1 x32/x64
- Microsoft Windows 10 x32/x64

### 1.2 Installation

You need ETS5 since 5.7.2. ETS4 and earlier ETS5 versions are **no longer supported**.

If you have an older App version, please uninstall this one first (in ETS5 bottom right at "Apps ... active").

## 2 Important changes since previous release

### 2.1 Changes since Release 4.0.1049.0.

- App does not run in ETS4 anymore

### 2.2 Changes since Release 4.0.410.0.

- FIX: When checking the naming conventions, sometimes correct entries were not recognized.
- FIX: In the list element for entering several entries for the naming convention, the line break for entering the next entry works now.
- NEW: Instead of the internal abbreviations, the datapoint types are now displayed with language-dependent plain text as in ETS.
- NEW: Information on the individual devices for the datapoint types to be set - both in the detail area (expand when selecting a line) and in the properties window. Device entries can be deselected before setting the data point.
- NEW: only in ETS5: datapoint types can also be set for linked group addresses (also retroactively).

### 2.3 Changes since Release 4.0.350.0.

- NEW: Layout changes for ETS5
- NEW: Checking for Datapoint types can also be restricted to selected devices - please see help file for further information.

### 2.4 Changes since Release 4.0.294.0.

- NEW: Works also in ETS5
