

## Release Notes for Function Test 5.0 (Build 1446)

### 1 General information

Please check for new App versions!

#### 1.1 Prerequisites

The App “Function Test” requires ETS5 at least in version 5.7.4. Installation is possible on all operating systems supported by ETS5.

#### 1.2 Installation

Install the App via the App list in ETS5. See ETS5 help file for details

#### 1.3 Mobile access

You can operate the App also from a mobile device (iOS or Android) using the App “Elvis Viewer”.

- For iOS, at least version 1.2.66 of the App is required.
- For Android, at least version 3.3.300 of the App is required.

## 2 Important changes since previous release

### 2.1 Changes since Release 4.0.761.0

- CHG: Update to the newest component versions of ETS SDK and Elvis
- CHG: Import option for user-defined function types
- NEW: Clear test results

### 2.2 Changes since Release 4.0.496.0

- NEW: Option “use connected Group Addresses only” to speed up visualization
- FIX: building functions with standard function type and user-defined roles are detected and evaluated

### 2.3 Changes since Release 4.0.380.0

- Functions Wizard: The room name does not need to be at first position when separated with spaces
- Projects created with the ETS 5.5 project wizard are now recognized
- If a role is coded in the middle group name and the group address name, now an AND condition is created
- On each start, the project data is evaluated anew
- Display corrections on mobile devices
- Corrections in calculation of datapoints in online view
